

SouthEast Exchange

Connecting local professionals and teachers.
Exchanging ideas, knowledge, and experiences.
Facilitating local connections in Juneau classrooms.

Dear Community Member,

- Interested in sharing your STEM expertise in Juneau's classrooms?
- Wanting to get kids excited about and interested in STEM areas?
- Looking to share good food and drinks with old and new friends?

Join us for networking activities with the professional and educational community of Juneau. Our goal is to connect STEM professionals (Science, Technology, Engineering, Math) and College Students with pre-K - 12 educators so that we can integrate real life science into our classrooms.

We know that when kids can experience real, meaningful connections to what they're learning that they will understand better and learn more. We think that there are great connections between what you do in your "real life" as a STEM expert and what kids are learning in school. We're hoping that you'd be willing to spend some time with teachers brainstorming what those connections might look: field trips, demonstrations, photos...

Please join us for free nibbles, drinks, and... cross your fingers that you get one of the great door prizes.

Join our 2nd annual event! **S.E.E. STEM 2018**

Wednesday, October 17th
5-7 pm
at UAS Rec Center
12300 Mendenhall Loop Road

Organized by local teachers, scientists, and parents in conjunction with the Juneau STEM Coalition.
